Hi Tobias

Alderaan is taking a different approach. Using the mc68150 instead of the mc68360. You are right - we tried the 68360 and it is not for the faint of heart. I did get parallel port and serial to work but it was a bunch of magic to get coupled to 040 that was never clear so I abandoned that approach. I hope that I can use a scaled up version of your DRAM controller in the design. I will be starting a Alderaan thread once Andrew and I have more of the initial design fleshed out.
