ECB Protoboard III  1606
Updates

04-Oct-2017

(mandatory, 6 wires, no cutting)

1.  A7:  connect U5.2 to U2.3
2.  A6:  connect U5.4 to U2.5
3.  A5:  connect U5.6 to U2.7
4.  A4:  connect U5.8 to U2.9
5.  A3:  connect U5.11 to U2.12
6.  A2:  connect U5.13 to U2.14

Schematic remains current, but A7..A2 leaving the bus are not connected to A7..A2 on K1..K6. This is a Kicad netlist bug, IMHO.
