* RTC moved from P3.1.2.6

* rev. 2017-12-10
PERRG detect moved from P1.0

open collector
weak pull-down at Reset

Ready drive for FPU is on ECBdrivers.sch

DMaint can be IR12 or IR13
IDE-INT best on IR14
FDC-INT may be IR6 (ECB bus)
Programming will always use RTS/CTS protocol, despite J2 selection of the actual Terminal protocol.
VOLTAGE DIVIDER:
2700/4700 or 3300/5600
5% TOLERANCE (GOLD BAND)
IDE connector supports 8-bit data transfers only
This is good for CF cards, but not most Hard Disk drives
